

JOHN S. SAYWARD, Editor.

MONDAY, OCTOBER 25, 1841.

Launch of a Ship at Bluehill.

Our correspondent at Bluehill informs us the ship *George Stevens* of 500 tons burden was launched at Bluehill on Saturday the 16th inst. from the ship-yard of Messrs. Stevens & Faulkner. He adds that this noble ship was built by Mr. Samuel Noyes of Castine, a superior architect, and is highly creditable to his skill and fidelity in the art of ship building. She is built of the best materials which this country affords; her top being wholly of white oak, and hackmetack; she is richly copper fastened, and is thought to be a superior model. In this ship there has been used, twenty six tons of iron and fourteen pounds of copper to the ton.

This ship was built, and launched entirely without the use of spirits, which probably accounts for the pleasing fact, that from first to last, not the slightest accident has occurred, or the least difficulty happened, either among the proprietors or the workmen.

The *George Stevens* is owned by Messrs. Stevens & Faulkner, together with some other gentlemen, and is expected to sail within a few weeks, under the command of Capt. John Cushing of Bluehill.

It is informed that we publish all communications that come to us, no matter from whom, if we think them worthy, and have space. And that we reject communications when we think we should do so, without regard to the writer. We should be glad to receive well-written communications from any man, who has a good thought to present, in good temper and good taste.

Mr. Samuel F. Dike has been ordained as Pastor of the Bath Society of the New Jerusalem church. Rev. Adonis Howard, ordained Pastor of the Gardiner Society of said church.

The city council will meet this evening at seven o'clock.

A Dangerous Bridge.

Mr. Editor, I wish to call your attention, and that of the public, to the present condition of Central Bridge, and I should like to have your opinion, as to whether an action for damages could be sustained against the city for an injury occasioned in crossing it.

It is now absolutely dangerous for either carriage or foot passengers to pass this bridge. Many of the planks have been taken up and in some places the whole width of the walk is removed, or broken away, occasioning large gaps through which a person might be precipitated to the rocky bottom of the stream, a depth of twenty feet, which would be almost certain death.

Now if the owners of the bridge will not take care of it, and will not let the city do it, our Street Commissioner should cause the entrance to either end to be closed, by putting up posts on the edge of the gutters, so as to effectually prevent strangers from passing.

Persons entering the City unadvised as to the peculiar condition of our streets and bridges, have a right to suppose that this bridge leading directly through the heart of the city, and the direct road to one of our largest Hotels, is in a passable condition, and unless the City Authorities take all possible means to prevent such persons from passing it, they must be held responsible for accidents happening in consequence. A slight notice in a daily paper is no notice to any, but those who know it already, and the public will not hold those guilty who by neglect of plain duty, shall be the cause of death or serious injury to any one.

There must be power in our government to remove the evil complained of, and I trust it will be speedily exercised. DELAYS ARE DANGEROUS.

As our opinion is desired we give it. We agree with the writer that the Bridge is dangerous very much so. We think the Street Commissioner has no more right to stop up the entrances to the Bridge, than the entrance to any man's door yard or wharf.

We doubt as to city being responsible for damages which may happen. The Bridge is a nuisance, and as such, should be abated by the courts. Ed.

The "Commodore Morris."

A beautiful ship called the "Commodore Morris," of about 300 tons, was launched at Falmouth, (Woods Hole), from the ship yard of Mr. Solomon Lawrence, on Saturday last. She is owned by Messrs. O. C. Swift & Co., and is intended for a whaler.

The beautiful ship "Canton," of 415 tons, owned by Messrs. Brooks & Packard, was launched on Saturday last at Wiscasset, by Mr. Robert Trevett. She is to be commanded by Captain Packard, of W. Bath Tel.

The Debt and Currency of Pennsylvania.

The debt and the currency of Pennsylvania are becoming more and more the engrossing matters of interest to the people of that State. The wreck of the United States Bank, which has affected all stocks, and the whole credit of the country, at home and abroad, falls with peculiar force on Pennsylvania. The National (Philadelphia) Gazette computes the amount of the funded and floating debt of the State to be over \$40,000,000, which is increasing by the addition of the interest. Now, it is well known, the Banks of Pennsylvania can provide for this debt no longer. Their capital is too small, and they are too much embarrassed by the Poor Notes of the United States Bank, and by suspended paper. The Gazette sets down the Bank capital of the city and county at \$16,620,000, but deducts from it \$5,000,000 United States Bank Poor Notes, which, with other deductions of suspended paper, and the State Stocks, leaves, according to the Gazette, for active use, but about three millions of dollars. The \$11,000,000 in deposit, the Gazette reasons, operate to embarrass rather than to benefit the banks, as prudence forbids their loaning out this sum beyond their immediate use and control. The Gazette, therefore, urges that the State must rely upon its own resources, that it must toll the whole of its public works, and then lay taxes enough to extinguish the balance of the debt. The State management of the public works, it is reasoned, at an expense, while profit would accrue, if these works were in the hands of individuals.

Mechanics' State Convention.

A Convention of the Mechanics of Maine assembled at the State House at Augusta, on the 20th of October, and was organized by the choice of the following officers:

OLIVER GERRISH, of Portland, President.
JOHN S. SAYWARD, of Bangor, Vice President.
CHAS. C. ROBBINS, of Gardiner, Secretary.
AUGUSTUS BRICK, of Augusta, Secretary.
JAMES OLIVER, of Bath.

A fervent prayer was offered by the Rev. Mr. Freeman.

The whole number of delegates was 120.

During the Convention addresses were made by James R. Macomber, of this city, Luther Severance, of Augusta, and Oliver Gerrish of Portland.

A letter was read from the Eastport C. M. Association, stating reasons why they did not send delegates to this Convention.

The following resolutions were introduced separately by members of the convention, and adopted, viz:

By Mr. Holden, of Portland.

Resolved, That for ages there has existed a prejudice against mechanical pursuits and manual labor, having its origin in the ancient and arbitrary distribution of rights; in false views of the true elements of individual and national prosperity; and a mistaken idea of the law of God, which makes so much of good to man depend upon physical exercise and steady occupation. And this prejudice is mainly perpetuated, in this country, by neglect amongst mechanics of a vigorous effort for mental and scientific attainments.

By Mr. Sayward, of Bangor.

Resolved, That the establishment and generous support of associations among mechanics for mutual encouragement and aid in the great enterprise of mental, moral, scientific and social improvement, have been productive of immense benefit to mechanics by awakening a spirit of inquiry giving vigor and directness to thought; enlarging the circle of fraternal sympathy, and resulting in great personal attainments and general elevation. And that these benefits may be extended, it is expedient to increase the number of such associations in this State.

By Mr. O'Reilly, of Augusta.

Resolved, That while it is the especial duty of mechanics to use all honorable means for promoting their own elevation as a class, it is also their duty to aid in promoting the best interests of all other classes.

By Mr. Walker, of Bath.

Resolved, That it is inexpedient for this Convention to form a State Society at the present time.

By Mr. Clark, of Portland.

Resolved, Unanimously that the Convention witnessed with pleasure the presence of His Excellency the Governor, in the Hall, this afternoon, and that he be requested to take a seat in our body, as much of the time as will suit his convenience, and the delegation from Bangor, be a committee to wait upon and communicate to him this vote.

By Mr. E. Low, Jr. of Bangor.

Resolved, That among the most efficient means of correcting public opinion, and of removing any real or imaginary causes of complaint, is a vigorous determination on the part of mechanics to encourage their apprentices, by their own example, and by every other means in their power, to inform themselves in the elements of science, and to place within their reach the means of acquiring such information.

By Mr. Walker, of Bath.

Resolved, That it is no less a measure of justice to each mechanic of this State, than to the best good of apprentices under his charge, to insist upon apprentices complying with those necessary conditions upon which they are received as such; and that it is urgently recommended to apprentices to resist all temptations to leave the service of their masters, and to mechanics generally to discourage the violation of an agreement between masters and apprentices, by refusing to employ them.

By Mr. Eaton of Bath.

Resolved, That knowing, from the little experience we have had, something of the benefits to be derived from the formation of Mechanics' Associations, we hope, and earnestly recommend to the mechanics throughout the State to form Associations forthwith, in every town and village, for the purpose of intellectual improvement, not only for the individual interests of the mechanics as a class, but also for the interest of the community; for intelligence is the grand basis of all genuine intellectual moral reform.

By Mr. Macomber of Bangor.

Resolved, That an exchange of lecturers among the several Mechanic Associations in Me., would be promotive of enlarging a friendly acquaintance, of extending a knowledge of the best means of conducting the exercises of such institutions, and a cheap and effectual method to secure a succession of useful lectures.

By Mr. Heath of Augusta.

Resolved, That all true patriots, all lovers of their country, view with delight the improvements that are being made in the useful arts, as showing that the latent energies of the mass are being directed to their original purpose the good of man.

By Mr. Leavitt of Portland.

Resolved, That although isolated effort may effect much, yet on associated exertions depend in a great degree, the prevalence of many principles, which Mechanics are beginning to see lie at the foundation of their social, moral, and intellectual welfare.

By Mr. Sherwood of Belfast.

Resolved, That the delegates from towns where no association exists, be requested to use their best endeavors in organizing associations in their respective towns as soon as may be convenient after their return home from this convention.

By Mr. Beale of Bangor.

Resolved, That a Periodical devoted to the interests of Mechanics, judiciously conducted, would afford excellent service in promoting their elevation as a body, and be entitled to the hearty support of the Mechanics of the State.

Resolved, That the members of this Convention unanimously pledge our individual patronage and influence to support a paper devoted to the elevation of the mechanical class, should such undertaking be commenced by any of our brethren, and we cordially unite in the desire that this sentiment may meet with a response from every Mechanic in this State.

By Mr. Severance of Augusta.

Resolved, That where Mechanic Associations are narrowly limited in numbers, and their libraries necessarily composed of few books, it may be found in some instances practicable and beneficial to exchange their books with other associations after they have all been read.

By Mr. Walker of Bath.

Resolved, That this Convention recommend to the several Mechanics Associations in this State,

and mechanics generally, in towns where there are no Associations, to send delegates to attend a Convention to be held at such time, and place next year, as the several Associations may hereafter agree upon.

By Mr. Hunt of Augusta.

Resolved, That we will use our endeavors in case of misunderstanding between ourselves and our brother mechanics and others, to have it adjusted by reference or arbitration, rather than resort to the usual course of law, and thereby save our funds for a better use.

By Mr. Wingate of Bangor.

Resolved, That the disposition to gain an elevation by depressing another in the same pursuit, is unworthy the present intelligence of the Mechanics of Maine.

By Mr. Barnes of Portland.

Resolved, That the old notion, that some trades rank higher than others, in the scale of dignity, is erroneous in theory, injurious in practice, and should be repudiated.

By Mr. Holden of Portland.

Resolved, That the thanks of this Convention be presented to the Augusta Charitable Mechanic Association, for the excellent arrangements made by them for the convenience of this Convention, and also for the hospitality manifested towards us individually.

By Col. Misters of Hallowell.

Resolved, That the thanks of this Convention be presented to Oliver Gerrish, Esq., for the able and impartial manner in which he has presided over its deliberations.

By Mr. Walker of Bath.

Resolved, That the thanks of this Convention be presented to Mr. Macomber, of Bangor, Mr. Severance, of Augusta, and Mr. Gerrish, of Portland, for their very interesting addresses before this Convention.

By Mr. Holden of Portland.

Resolved, That the thanks of this Convention be presented to Rev. Frederick Freeman for his fervent and appropriate prayer, offered at the opening of this Convention.

The Convention was addressed by many of the delegates in addition to those who presented resolves. The right spirit prevailed throughout all the deliberations, and we cannot doubt that great good will be the result. The strong testimony presented in favor of association among mechanics for mental, scientific and moral improvement, should have a tendency to cause a rapid multiplication of associations in our State. We regret that our limits will not allow of giving a portion of the several addresses and speeches. An attentive reading of the resolves will show their general scope and bearing.

Guy Kent was called upon, and he responded in a speech of much beauty and force. He bore ample testimony to the intelligence and influence of the Mechanics of Maine. He gave an eloquent description of the resources of Maine, and of the means by which, she may be made rich and prosperous with a largely increased population. His remarks were listened to with the highest satisfaction.

The Convention separated after a session of a day and a half of delightful and profitable intercourse.

-STATE OF MAINE.

BY THE GOVERNOR.

A Proclamation for a day of Public Thanksgiving and Praise.

If the honored fathers of New England, in their days of calamity and danger, found cause of thankfulness to God, and established the custom of an annual, united expression of gratitude and thanksgiving, it certainly becomes us, who reap in joy what they sowed in tears, both from reverence to their memories and the evident propriety of the example, devoutly to observe a custom, at once so simple and so useful.

I do, therefore, with the advice of the Executive Council, appoint THURSDAY, the twenty-fifth day of November next, to be observed by the people of this State as a day for PUBLIC THANKSGIVING AND PRAISE.

Let us, on this time-honored anniversary, review with grateful hearts, the many public and private blessings we have witnessed and experienced. Let us thank God for health, for plenty, for the guardian care which has given protection and support to all living things; for the beauty which has delighted and the bounty which has fed us; for the comforts and joys of domestic life; for all the consolations which have sustained and all the hopes which have cheered us; for the light which has been shed upon our path, and all the good influences which have advanced us in moral strength and Christian holiness, and awakened and cherished the kindly sympathies and benevolent feelings of our nature; and particularly for that moral movement, which has already rescued thousands in our land from the degradation and misery of intemperance, and carried joy to the hearts, and happiness to the homes, of the disconsolate and despairing.

By the associations and intercourse of this religious festival may the ties of family affection and social union be strengthened, and may love to God, who is our father, and love to man, who is our brother, be awakened, and purified from all the dross of hypocrisy and selfishness. In remembrance of all the loving kindness of God to us, and to our fathers, let us from the heart thank Him for the past and take courage for the future, in the undoubting assurance that His mercies are measured, not by our merits, but our wants.

And the people of this State are requested to observe the day with the usual religious services, and to abstain from all unnecessary labor and inconsistent recreation.

Given at the Council Chamber, in Augusta, this sixteenth day of October, in the year of our Lord one thousand eight hundred and forty-one, and of the Independence of the United States the sixty-sixth.

By the Governor.

SAMUEL P. BENSON, Sec'y of State.

Mechanics' State Convention.

The Mechanics' State Convention adjourned yesterday at one o'clock. The proceedings will be found in another column. An excellent spirit seemed to prevail, and we anticipate much good as the ultimate result. But we have no room for comments. The Convention was addressed by many of the delegates and among them Gov. Kent, who being a spectator, was called upon and made some very judicious remarks upon the importance of encouraging the mechanic arts in this State. Ken. Jour.

It is said that tar is no protection to cordage in a polar winter. Sir John Ross found rigging of the *Fury*, wrecked in the polar sea, bleached as white to the core as if a particle of tar had never been applied.

BY THE MAIL.

Reading Contradict Money Arrest of Capt. Brown.

We learn from the Post-master at Eastport, that on Thursday last, Capt. Brown of the Sloop *Spy*, of Belfast, was committed to jail for passing \$5 counterfeit bills on the Suffolk Bank, Boston, dated July 1835. He has passed some in Calais, some at Eastport, and 5 bills were found on board the Sloop, turned away in a ruffian.

The nomination of Judge Weston, as Chief Justice of the Supreme Court of this State, was rejected by the Executive Council, on Saturday last, by a vote of six nays to one.

The nomination of John S. Tenney, as associate Judge, was confirmed.

Important matter brewing relative to the U.S. Bank.

The Philadelphia National Gazette says: A suit, we learn, has been instituted against the Bank of the United States for the balance yet owing on the bonds given in 1836, in settlement of the government interest in that institution, at the expiration of the original charter.

Some important questions will undoubtedly arise under the proceedings. The Government will claim a priority over all other creditors upon the property of the Bank, without regard to any assignments of it which have been made. This, if contested, will lead to testing the validity of those assignments. Another and very important question in which the public is interested will be brought up. There is still outstanding of the issues of the Bank, prior to the expiration of its charter in 1836, about half a million of dollars of its notes. The Government was at that time a co-partner with the Bank. A settlement was made by the Government with the representatives of the Bank under its new charter, obtained from the State of Pennsylvania; and its bonds were given for the amount decided to be owing to the Government for its interest in the old bank, payable in a series of years.

In this settlement the new bank undertook to discharge all the obligations of the old one. It has yet done it, and so far as these notes may come in and be presented for payment, probably will not do it. The question then is, whether the Government is not liable, both in law and equity, for the payment of those notes.

Were it an individual case, he would most unquestionably be held liable. The Government received back in the settlement, not only the capital originally subscribed, but, in addition, about fourteen per cent., and we are not certain that these profits did not arise, in part, upon an estimated amount of notes issued, which it was supposed had been lost and would never be presented for payment.

Tennessee.

The Legislature on the 9th counted the votes for Governor, and declared the following result:

For Col. James C. Jones, (W.) 53,586
Hon. James K. Polk, (V. B.) 50,334

Whig maj. 3,252
Campbell county not returned. It gave 17 maj. for Polk.

A good deal of debate was had on a resolution to go into an election of U. S. Senator, but no day has yet been fixed.

C. C. Norvell and W. F. Bang & Co. publishers of the two Whig papers, have been chosen Printers to the House by 38 to 37 votes.

McLeod in Canada.

After all the statements made by those, who pretended to know about McLeod, and heard him converse, that he had sailed in the *Acadia* from Boston, it turns out that he is in Canada. The Montreal Herald, chronicles his arrival there. It is proposed to give him a public dinner and to make him a sort of nine days wonder.

Hayti.

Accounts from Jamaica state that it is probable a revolution will soon take place with a view to overthrow the despotism which exists under President Boyer, in Hayti, who is a mulatto, and is hated by a majority of the people.

Hayti is a republic only in name the President holding his office for life, and the Senate chosen, for six years, from candidates nominated by him.

President Boyer has become enormously wealthy, by his salary, his trade and his exertions. His chief adviser is Ingine, Secretary of State, a black man being assassinated some three years since. Boyer and Ingine are both mulattos, as are a majority of the public officers, while a majority of the people are black.

Late from Tampa Bay.

The St. Augustine News of the 8th inst. has advised from Tampa Bay to the 1st inst. Col. Worth was to ship from 250 to 300 Indians west on the 6th inst. Among them were 95 warriors.

On the 21th the troops were to be simultaneously in motion throughout the Territory.

We regret to learn that Capt. Ketchum, 6th Infantry, died recently, in Middle Florida.

The News remarks: "The rapid close of the war, by the constant surrender and capture of the enemy, is an event of rejoicing; but with this apparent prospect of peace, a perfect security does not exist. Marauding parties of the enemy are in small bodies, occasionally throughout the country, and the traveller, and settler, require caution, vigilance and care. To a neglect of this, much of the loss of life may be attributed."

Important (if true) from the Santa Fe Expedition.

The Red River Republican of the 30th ult. gives the following news: "We learn from travellers direct from the upper part of Texas, that the Santa Fe expedition turned back before it reached its destination. Its progress was at first impeded by the attacks upon it of bands of hostile Indians, but having sent back and received reinforcements, it continued its journey until the force of the enemy became so large as to render its further progress impracticable. Some fighting took place, but whether any person belonging to the expedition were killed or not, was not ascertained."

From Florida.

Several murders have recently been committed in East Florida by a party of fifteen or twenty hostile Indians. Five distinct attacks have been made by them, and six or seven persons killed. Two brothers were killed near Micanopy. The

cattle of Fort All were driven off by the On their retreat they came across the encampment of Capt. Fulk's 2d Dragoon, and a rush upon it, but were quickly repulsed; all of our men wounded. All is now quiet around Pilatka.

Amendments to the Constitution. The votes on the proposed amendments to Constitution, which have been returned to Secretary of State's office, stand:

On the question of biennial elections, 8,993; No, 26,851. On the question whether the number of Representatives shall be 15, Yes, 23,217; No, 5,615. Something like twenty towns and places have made no returns on this question; but part of those probably did not vote on it, as they returned the other votes. Kennebec Jour.

TRADE AND COMMERCE.

New York Oct. 22. Flour—Owing to a break in the Canal, the receipts have been very light for three days past, and holders have put up price to \$6, at which the price stands, and is likely to remain.

Corn. There is no Rye here. Northern Corn 70c and Southern 65c. Two lots of Wheat sold, but no more.

Wheat. Potatoes have improved sales at \$6 3/4. Cotton. The market is brisk, no alteration in the price. Sugar and Coffee have declined. Philadelphia, Oct. 19. Flour and Meal. Flour has been a fair export demand for the week, sales of common to fair brands at \$7 per bushel, good brands at 6 1/2. The supplies continue limited. Rye Flour is steady at 3 3/4. Corn at \$2 7/8 per bushel with sales.

Grain. There is some export demand for Wheat. We note a sale of good Penn. red at 4 1/4 3/4 per bushel, and a lot of Southern red at 4 1/2 Rye. A sale of Southern at the sale of Penn. was at 60c. Corn is in demand. Sales of round yellow at 65, flat do 63 1/4, a white at 62c. Oats a sale Southern at 45c per bushel.

Hides. Sales of 1,600 Porto Cabello and L. uayr of 14 1 1/2 per lb 4 mos.

Provisions. The demand is falling off, but prices remain nearly as at our last report.

DIED.

In Oldtown, on the 23d inst., at the residence of the Rev. Mr. Blanchard, Col. James O. Eaton, of Mr. Enoch Eaton, of this city, aged 21 years, 7 months.

Funeral to-morrow, (Tuesday), at 2 o'clock P. M. at the residence of his father, on Fourth Street. Friends and relations are requested to attend without further invitation.

MARINE INTELLIGENCE.

Old fm Boston, 21st, barque Amos Patten, Tob. O. Thompson, Frankfort.

At New Orleans, 7th, barque Ludwig, Larnou, Thonouton.

At Baltimore, 18th, brig Lela, Hatch, Eastport. Sld fm New Haven, 17th, schs John Frederic Lumphreay, and Lose, Lumphreay, Bangor.

At Providence, 18th, sch Henry Clay, Elm, Bangor; sailed, 20th, sch Tarquin, Herriman, Bangor.

At Holme's Hole, 20th, sch Marquis, from Bangor for Providence.

Sailed fm Salem, 19th, sch Mill Creek, Herriman, Bucksport.

Sch. Royces, from Castine for Pictou, sailed away at Cape Negro, 14th inst., crew sailed particulars.

Old fm Boston, 22d, schs Swift, Richardson, Eastport; Mechanic, Bryant, Bangor; H. T. Howland, do.

At Norfolk, 18th, sch Forest, Gilchrist, Thonouton.

At Alexandria, 18th, sch Falcon, Moore, Elm, do.

At Providence, 21st, sch Helen Mar, Elm, Camden.

Sch Cordelia, Capt. Hone, sailed from Bermuda, 27th. Left for Camden, Me. Put back to George's on the 8th inst. with loss of sails, rigging, boats, bulwarks, chain and anchor.

Sch Atlantic, Raynes, of and from Camden. Pictou, lost on Cape Negro, 14th inst., was insured for \$2000.

FLANNELS.

10 PIECES super, twill and plain red flannel just received and will be sold cheap by the piece or yard, at No. 40 Main street.

Oct. 25. A. H. MERRILL.

FOR BOSTON.

The copper-fastened, well furnished, and fast sailing Schooner FORTY MC, A. PARKER, Master, will sail for Boston with dispatch. For freight or passage apply to Master on board, at Patten's Wharf.

Oct. 25. 43*

MAYOR'S OFFICE
Bangor September 7, 1841
AGREABLY to the following Order of the
City Council public notice is given to all
persons interested that they may govern them-
selves accordingly
- ORDERED - That the Street Commissioner
cause the fence on each side of Main Street, be-
tween Union Street and the South line of Bangor,
to be removed to the exterior line of the street as
laid out and accepted by the city. And that un-
less the same be done by the proprietor of the
lots on said street by the first day of November
next the said Street Commissioner shall forthwith
order that the fence be removed and fences And that the
Mayor or municipal officer of this Order by a pub-
lication thereof in the Daily Whig & Courier.

Air tight Stove Improved.
Cast and Sheet Iron,
WITH every variety of improvement, selected
with great care from the waste cities.
The subscriber having some experience in the
manufacture and use of the above named Stoves,
has been enabled to add some very valuable im-
provements whereby they are rendered more con-
venient and durable
He now offers the Stoves either as made hereto-
fore or with these improvements. The Air Tight
Stoves are decidedly the most convenient and econ-
omical Stoves ever offered to the public. A large
number of them have been sold, and they give uni-
versal satisfaction
